Implement Azure Container Apps

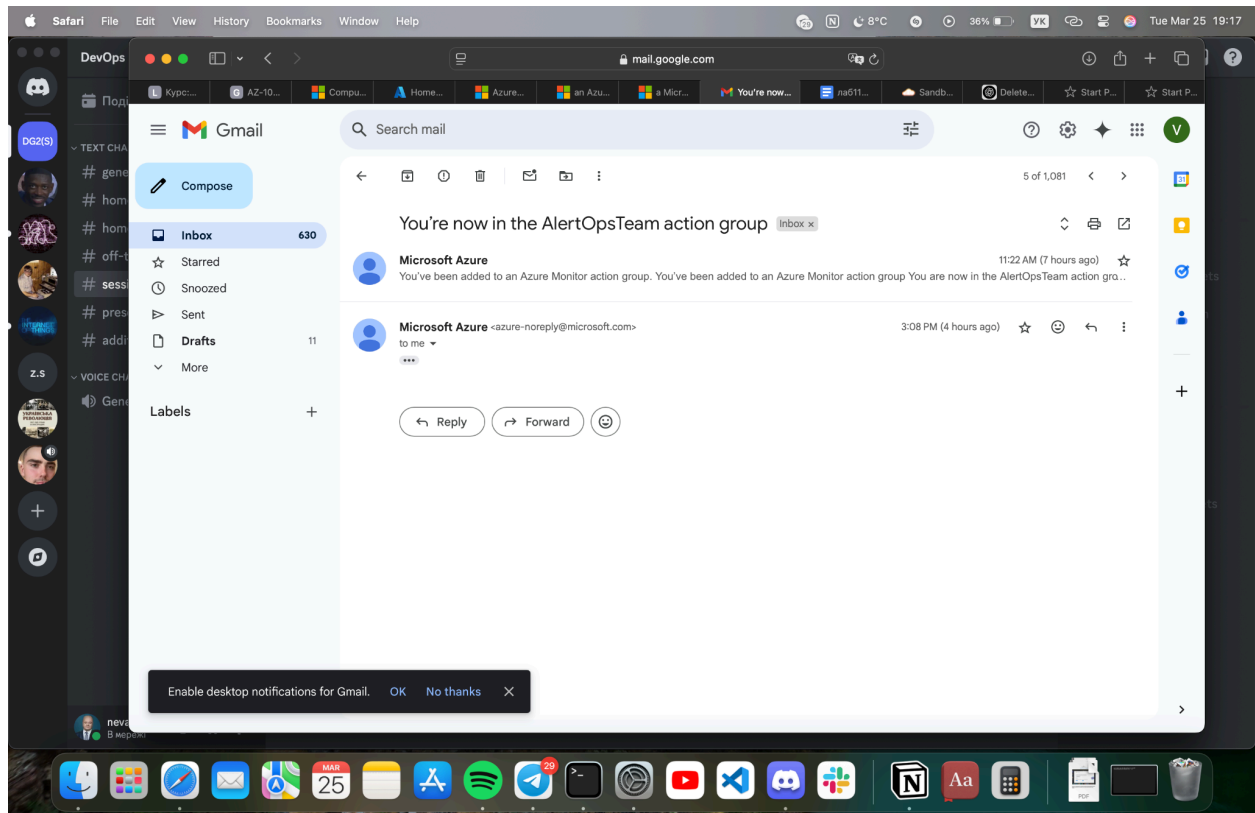

Task 1: Use a template to provision an infrastructure

Task 2: Create an alert

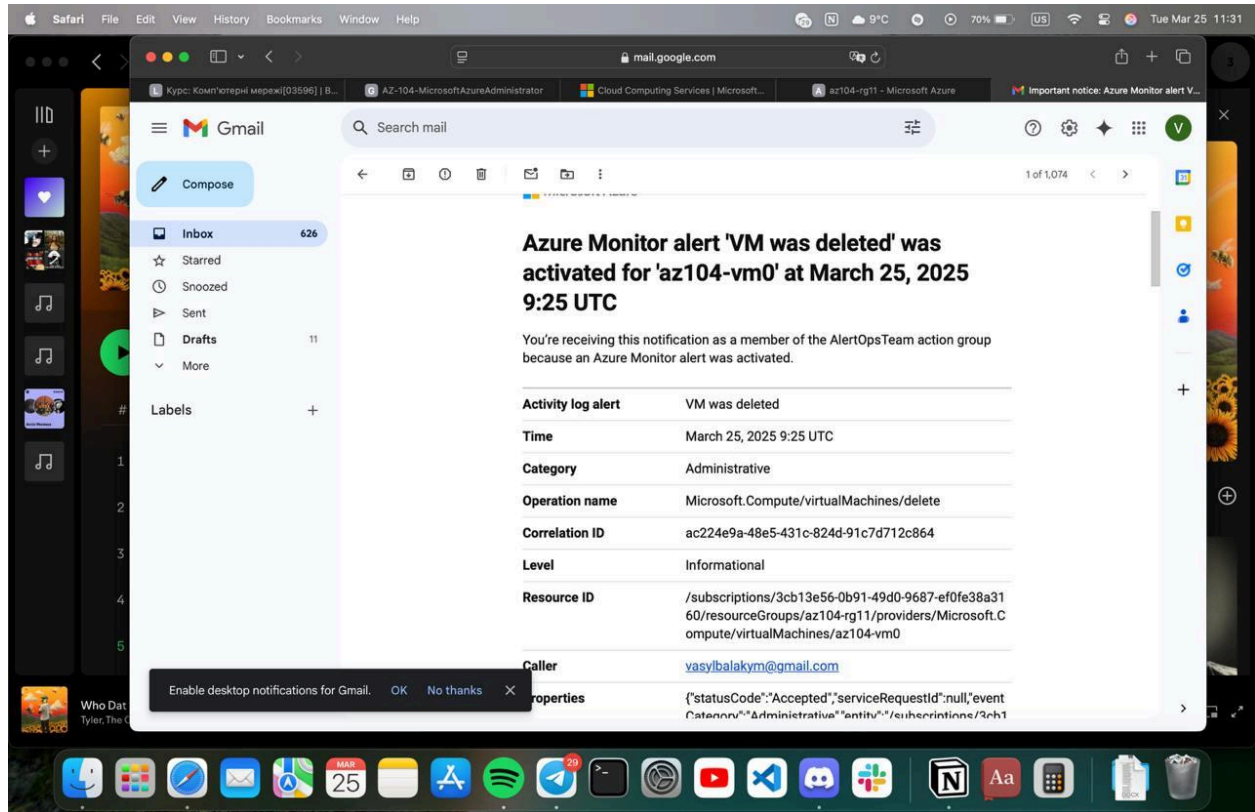

Task 3: Configure action group notifications

Task 4: Trigger an alert and confirm it is working

Task 4: Trigger an alert and confirm it is working

Task 5: Configure an alert processing rule

The screenshot displays the Microsoft Azure portal interface. The main navigation pane on the left shows the 'Alert processing rules' section. The central pane displays the 'Planned Maintenance' alert processing rule configuration. The rule is currently in a 'Planned Maintenance' state, indicated by a yellow banner. The configuration details include:

- Resource group:** az104-rg11
- Location:** Global
- Subscription:** Azure subscription 1
- Subscription ID:** 3cb13e56-0b91-49d0-9687-e0fe38a3160
- Tags:** Add tags
- Scope:** Resource (az104-rg11) and Hierarchy (Azure subscription 1)
- Rule settings:** Rule type: Suppress notifications

The bottom of the screen shows the macOS dock with various application icons, including Safari, Mail, Calendar, Photos, and the Microsoft Edge browser.

Висновок: у лабораторній 11,ми спершу створили інфраструктуру(вм) для подальшої роботи з алертами.Після чого створили alert(під час створення створили action group в котру добавили мене щоб отримати сповіщення про видалення вм).Налаштували всі правила алертів та за допомогою триггеру(видалення вм) отримали повідомлення про видалення вм.
